## List of Tables

### Table

- 1 Summary Program Information for Priest Rapids Hatchery - URB Fall Chinook
- 2 Compliance with Performance Measures: Priest Rapids Hatchery - URB Fall Chinook
- 3 Remedial Actions Required at Priest Rapids Hatchery - URB Fall Chinook
- 4 Adult Contribution to Fisheries, Spawning Grounds and Hatcheries:  
  
Priest Rapids Hatchery - URB Fall Chinook

5 Annual Operating Expenses: Priest Rapids Hatchery - URB Fall Chinook

6 Annual Operating Expenses - Priest Rapids Hatchery

## **Executive Summary**

This report presents the findings of the independent audit of the Priest Rapids Hatchery - URB Fall Chinook program. The hatchery is located just below Priest Rapids Dam along the Columbia River. The hatchery is used for adult collection, incubation, and rearing of URB fall chinook.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

### **Background**

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) Strategy for Salmon and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

## **The Audit Process**

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

## **Priest Rapids Hatchery - URB Fall Chinook Results**

The Priest Rapids facility includes six ponds for adult holding and rearing, 12 vinyl-lined raceways, and incubation facilities. The Priest Rapids Hatchery is operated as mitigation for fishery impacts caused by the Priest Rapids Project ( Priest Rapids and Wanapum dams).

The Priest Rapids Hatchery - URB Fall Chinook program was in general compliance with most of the performance measures. In the area of program objectives, the hatchery did not have a goal for green-egg to eyed-egg and eyed-egg to fry survival. The audit found that the hatchery was not in compliance with the screen approach criteria and mesh size, water quality sampling requirements, and pathology-free water criteria, which are all facilities requirements. The hatchery was not meeting all of the alarm and feed preparation requirements. The hatchery exceeds its flow and loading criteria for incubation. The hatchery needs to develop specific incubation and rearing standards for the IHOT Operations Plan. The hatchery needs to develop a smoltification goal and implement a monitoring program. The hatchery did not have a Genetics Monitoring and Evaluation Program.

The specific areas in which the Priest Rapids Hatchery - URB Fall Chinook program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Change protocols to ship representative samples of eggs to Klickitat and Umatilla hatcheries
- Check water flow alarms daily
- Collect water temperature data
- Conduct IHOT QA/QC tests for feed preparation
- Develop approved genetics M&E program
- Develop green-egg to eyed-egg and eyed-egg to fry survival goal
- Develop smoltification goal and monitor
- Develop specific incubation and rearing standards for the IHOT Operations Plan
- Follow IHOT loading and flow criteria for incubation

- Modify or replace intake to meet IHOT screen criteria
- Monitor DO and TPG and record
- Provide chilling and heating for incubation
- Provide more incubators or change IHOT incubation criteria
- Review IHOT criteria for adult holding and rearing temperature criteria
- Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

## Facility Description

<b>Name:</b>	Priest Rapids Fish Hatchery
<b>Stock/Species:</b>	URB Fall Chinook
<b>Operating Agency:</b>	Washington Department of Fish and Wildlife
<b>Funding Agency:</b>	Grant County PUD
	US Army Corps of Engineers
<b>Location:</b>	The hatchery is located just below Priest Rapids Dam along the Columbia River.
<b>Address:</b>	P.O. Box 937 Mattawa, WA 99349
<b>Hatchery Manager:</b>	Mr. Paul Pedersen
<b>Phone:</b>	(509) 932-4481
<b>Fax:</b>	(509) 932-5188
<b>Purpose:</b>	The Priest Rapids Hatchery is operated as mitigation for fishery impacts caused by the Priest Rapids Project ( Priest Rapids and Wanapum dams).
<b>Production Goal:</b>	<b>URB Fall Chinook</b>  Produce 100,000 lb of subyearling URB fall chinook for on-station release  Produce 1.7 million URB fall chinook smolts as part of John Day mitigation  Provide URB chinook eggs to other facilities which rear this stock. Water is supplied to the hatchery from the Columbia River and wells.
<b>Water Supply:</b>	

The majority of the water is supplied by gravity flow from the Columbia River (44,883 gpm) with the wells supplying 8,000 gpm.

**Facilities:**

Adult Holding:	6 concrete adult holding ponds - 26,250 cf each
Incubation:	80 full stacks of vertical tray incubators (1,280 trays)
Early Rearing:	None
Raceways:	12 vinyl-lined starter raceways - 1,600 cf each
Rearing Ponds:	6 concrete ponds - 26,500 cf each
Satellite Facilities:	None

## Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

- |           |  |
|-----------|--|
| Section 1 | Performance Measures for General Information and Expenditure Information (PMs General 1-2) |
| Section 2 | Performance Measures for Program Objectives (PMs 1-4)                                      |

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

## The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit. This process consisted of research and onsite visits. The site visit at the Priest Rapids Hatchery was conducted on January 29, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.
3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.

4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

## **Compliance Status of Priest Rapids Hatchery - URB Fall Chinook**

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the Priest Rapids Hatchery - URB Fall Chinook program. Each performance measure is presented in a table taken from the audit form (Table 2). The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

**Table 1 Summary Program Information for Priest Rapids Hatchery - URB Fall Chinook**

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	Priest Rapids Hatchery	Klickitat Hatchery	Umatilla Hatchery			
Adult Collection	4					
Adult Holding	4

		N/A	Yes	?	No		
#23	<b>Transportation facilities</b>						
	Do transportation equipment and personnel receive disinfection before and after use?	4				Fish released onsite	
	Is the fish tank interior disinfected using a solution of 200 ppm active chlorine for 30 minutes minimum or formaldehyde gas generation method (relative humidity of 60% for 2 hrs)?	4				See above	
	Is the exterior of the fish transport vehicle disinfected using high pressure steam (115-130°C), high temperature acid, or with 200 ppm chlorine for 30 minutes?	4				See above	
	Is the fish transport vehicle (cab) disinfected using 600 ppm quaternary ammonia compounds (1.5 ml of 50% stock solution/liter water)?	4				See above	
	Is other equipment disinfected including fish pumps, nets, egg sorters, waders, boots, rain gear, hoses and other equipment using one of the following solutions?	4				See above	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

		N/A	Yes	?	No		
	200 ppm chlorine for 30 minutes 600 ppm quaternary ammonia compound for 30 minutes 200 ppm iodophor solution for 10 minutes	4					
	Do personnel wear protective garments when handling fish eggs or cultural water?	4				See above	
	Do the fish transport truck/chassis and tank/unit receive an inspection and service prior to the release season?	4				See above	
	Is a daily service inspection completed before starting up and leaving for the day?	4				See above	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23 (cont)	<b>Transportation facilities</b>						
	Does the fish transport unit receive an inspection prior to loading?	4				Fish released onsite	
	Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?	4				See above	
	Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?	4				See above	
	When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?	4				See above	
	Is water temperature in the transportation unit maintained within the 42-48 °F range?	4				See above	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

		N/A	Yes	?	No		
	Do fish releasing procedures include the following criteria?						
	Releasing the fish at the correct release site or into the correct water body.	4				See above	
	Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.	4				See above	
	The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.	4				See above	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#24	<b>Evaluation practices</b>						
	Has the hatchery conducted fishery contribution studies to:						
	Determine the requirements for evaluating and improving management programs?		4			Discussion	
	Develop guidelines that define the geographical area and identify component stocks (hatchery and/or wild) that comprise the management unit?		4			Discussion	
	Develop guidelines that define if the proper stocks of fish are currently being used?		4			Discussion	
	Determine which management units contribute to a specific fishery and the time periods of those contributions?		4			Discussion	
	Determine the relative contributions of the various management units to a specific fishery over the different time periods?		4			Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#25	<b>Training practices</b>						
	Does the hatchery have a training schedule for its staff?		4			Review of records/Discussion	
	Does each staff member have a personal training plan approved by a supervisor and reviewed annually?		4			Review of records/Discussion	
	Does the hatchery routinely exchange training details between other hatcheries and agencies?		4			Review of records/Discussion	
	Does the hatchery encourage and reward off-duty training of staff?		4			Review of records/Discussion	
	Does the hatchery conduct monthly staff meetings?		4			Review of records/Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#26	<b>Are monthly hatchery monitoring visits being conducted by a qualified fish health specialist as described below?</b>						
	Conduct visit at least monthly		4			Review of records/Discussion	
	Monitoring conducted by qualified fish health specialist		4			Review of records/Discussion	
	Examine a representative sample of healthy and moribund fish from each lot.		4			Review of records/Discussion	
	Review fish culture practices with hatchery manager.		4			Review of records/Discussion	
	Report finding and results of necropsies on standard form.		4			Review of records/Discussion	
	Recommend appropriate drug or chemical treatment.		4			Review of records/Discussion	
	Summarize fish health status or stock prior to release or transfer to another facility.		4			Review of records/Discussion	
#27	<b>Are all of the functions of the hatchery yearly monitoring visits being completed as described below?</b>						

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

		N/A	Yes	?	No		
	Annually examine each broodstock for the presence of reportable viral pathogens.		4			Review of records/Discussion	
	Annually screen each salmon broodstock for the presence of <i>Renibacterium salmoninarum</i> .		4			Review of records/Discussion	
	Conduct inspection by or under the supervision of qualified fish health specialist.		4			Review of records/Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

	Location of release (PM #22a7)		4			Review of records/Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

		N/A	Yes	?	No		
#37	<b>Are fish reared in the subbasin or acclimated in the subbasin?</b>  See PM #22b		4			Discussion	
#38	<b>Is the release strategy appropriate for the program?</b>  See PM #22c		4			Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#39	<b>For new programs, has a broodstock collection plan been developed?</b>						
#39a	Is the broodstock collection plan written?	4				Existing Program; does not apply	
	For a non-captive broodstock program:	4				Existing Program; does not apply	
#39b	Was an unbiased, representative sample collected?						
#39c	Was the recommended number of broodstock collected?	4				Existing Program; does not apply	
	For a captive broodstock program:						
#39d	Were captive brood progeny excluded as donors for propagating the next generation of the captive broodstock program?	4				Existing Program; does not apply	
#39e	Were full-sib crosses avoided?	4				Existing Program; does not apply	
#39f	Is the broodstock collection plan understood and being followed by staff?	4				Existing Program; does not apply	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

		N/A	Yes	?	No		
#40	<b>For a new program, was the donor selection outline followed in selecting the hatchery broodstock?</b>						
#40a	Is a donor selection plan written?	4				Existing Program; does not apply	
#40b	Was the donor selection outline followed in selecting the broodstock?	4				Existing Program; does not apply	
#40c	Was the target stock recommended in the donor selection process actually used?	4				Existing Program; does not apply	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#41	<b>For existing programs, were the broodstock collection procedures followed?</b>						
#41a	Is the broodstock collection plan written?		4			Review broodstock collection plan	
	Does the broodstock collection plan follow the guideline:						
#41b	Was an unbiased, representative sample collected?		4			Discussion	
#41c	Was the recommended number of broodstock collected?		4			Discussion	
#41d	Were the broodstock collection procedures in hatchery operation plan understood and followed?		4			Discussion	

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#42	Was the appropriate number of spawners, male/female ratios, and fertilization protocols used?						
#42a	Are the spawning protocols written?		4			Review of spawning protocols	
#42b	Are daily or weekly spawning logs available?		4			Review of records	
#42c	Was the appropriate number of spawners used?		4			Discussion	
#42d	Did you attempt to spawn all collected broodstock and randomize mating with respect to age class, and other traits?		4			Discussion	
#42e	Was the sex-ratio within the limits given in the performance standards?		4			Discussion	
#42f	Were the fertilization protocols followed?		4			Discussion	
#42g	If the hatchery needed to reduce the number of eggs retained, was this done by representative sampling of each male/female cross?				4	Do not ship representative sample of eggs to Klickitat and Umatilla hatcheries	Change protocols to ship representative sample of eggs to Klickitat and Umatilla hatcheries

**Table 2 Priest Rapids Hatchery - URB Fall Chinook Compliance With Performance Measures**

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#43	<b>Is there a genetics monitoring and evaluation program in place?</b>						
	Is a genetics monitoring and evaluation program available?				4	None provided to team	Develop approved genetics M&E program
	Does the plan address the following elements listed in IHOT:						
	Does the program have elements needed to meet evaluation goals 1-4?				4	Discussion	
	Has a qualified geneticist reviewed and endorsed the program (goal 5)?				4	Discussion	
	Will the program collect the data and maintain the records needed to evaluate compliance on an ongoing basis (goal 5)?				4	Discussion	
	Is the program understood and followed by staff?				4	Discussion	

## Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

### The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

### Remedial Actions at Priest Rapids Hatchery - URB Fall Chinook

This section presents the corrective actions required to bring the Priest Rapids Hatchery - URB Fall Chinook program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ( $\pm 40\%$ ).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

**Table 3. Remedial Actions Required at Priest Rapids Hatchery - URB Fall  
Chinook**

Remedial Action Required	Cost	PMS <sup>1</sup>
<b>Type 1</b> - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery		
Increase adult returns	---	4h
<b>Type 2</b> - Remedial actions requiring changes in agency policies or procedures		
Develop green-egg to eye-egg and eyed-egg to fry survival goal	---	4d-4e
Review IHOT criteria for adult holding and rearing temperature criteria	---	5a
Check water flow alarms daily	---	6
Conduct IHOT QA/QC tests for feed preparation	---	12
Develop specific incubation and rearing standards for the IHOT	---	18-19
Operations Plan		
Follow IHOT loading and flow criteria for incubation	---	18
Develop smoltification goal and monitor	---	22a1
Change protocols to ship representative samples of eggs to Klickitat and Umatilla hatcheries	---	42g
Develop approved genetics M&E program	---	43
<b>Type 3</b> - Remedial actions requiring changes in monitoring coverage or interval		
Monitor DO and TPG and record	---	5b
Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants	---	5c-5g

Remedial Action Required	Cost	PMS <sup>2</sup>
<b>Type 4</b> - Remedial actions requiring significant capital expenditures		
Provide chilling and heating for incubation	\$1.2 million	5a, 5h
Provide more incubators or change IHOT incubation criteria	\$12,000	8
Modify or replace intake to meet IHOT screen criteria	\$5.0 million	10
<b>Type 5</b> - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
None	----	

## Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Priest Rapids Hatchery - URB Fall Chinook program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:  
Priest Rapids Hatchery - URB Fall Chinook**

<b>Year</b>	<b>Fisheries  (Broodyear)</b>	<b>Spawning Grounds<sup>1</sup>  (Broodyear)</b>	<b>Hatchery<sup>1</sup>  (Broodyear)</b>	<b>Total Combined Contribution  (Broodyear)</b>	<b>Smolt to Adult Survival (percent)</b>
1981					
1982					

Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

1983					
1984

1987	43	21	38	102	0.05%
1988	159	No data provided	106	265	0.13%
1989	333	44	213	590	0.30%
1990					
1991					
1992					

## Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Priest Rapids Hatchery - URB Fall Chinook program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Table 5a).

**Table 5. Annual Operating Expenses: Priest Rapids Hatchery - URB Fall Chinook**

Hatchery	1994	1995	1996
